

DESIGN. ANALYZE. OPTIMIZE.

Advanced engineering and design solutions that transform ideas into High-performance, reliable and future-ready products.

OUR SERVICES

ELECTROMAGNETIC ANALYSIS

Optimize performance, efficiency and power density with advanced EM simulations.

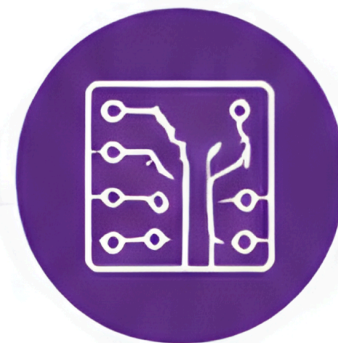

STRUCTURAL ANALYSIS

Ensure durability and reliability with precise stress, vibration and mechanical integrity analysis.

THERMAL ANALYSIS

Thermal modeling and heat management solutions for safe, efficient and reliable performance.

PCB DESIGN

High-performance PCB design for power electronics, control systems and embedded solutions.

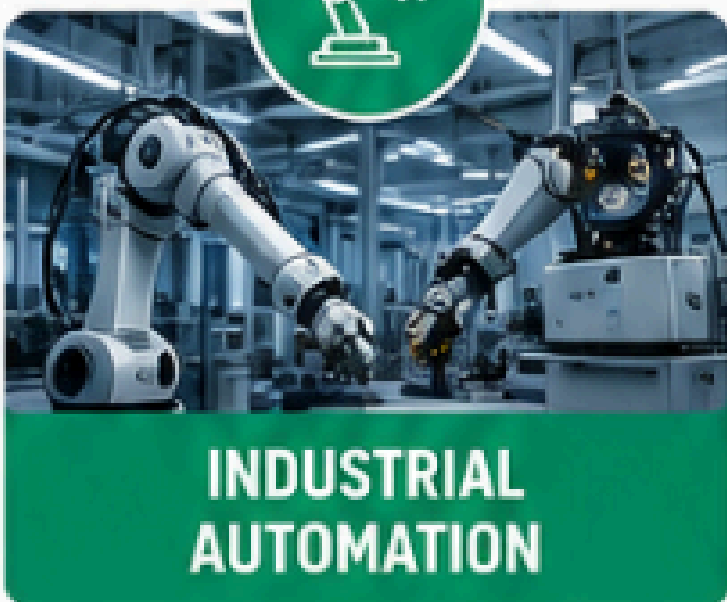

HVAC SOLUTIONS

Efficient HVAC design and analysis for thermal comfort and energy-efficient systems.

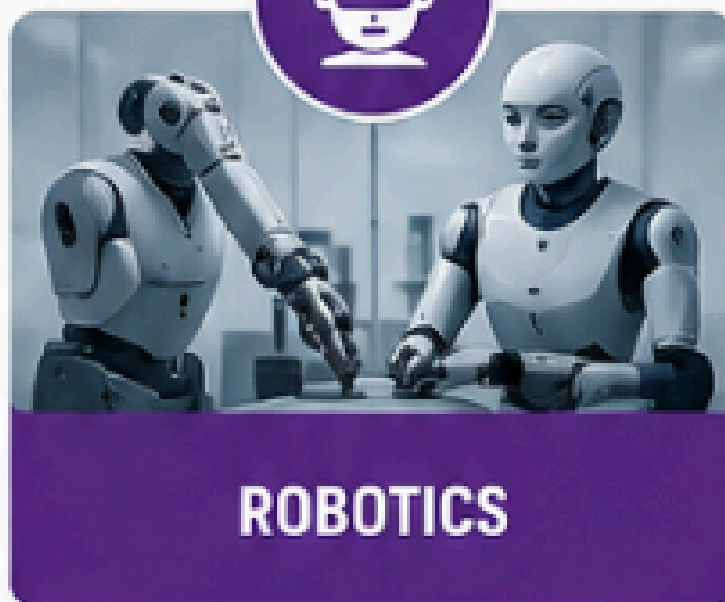

SOLUTIONS FOR INDUSTRIES THAT MOVE THE FUTURE

ELECTRIC MOBILITY & EV SYSTEMS

INDUSTRIAL AUTOMATION

ROBOTICS

HIGH-PERFORMANCE MACHINERY

**LET'S BUILD
THE FUTURE TOGETHER**
We welcome collaborations,
partnerships and project inquiries.
